- Programming: C, Python, Java
- Web: HTML, CSS, JavaScript
- Tools: Git, VS Code,Ms office suite
- OS: Linux, Windows
- Design Tools: Figma,Canva

## PROJECTS

### • PC ASSEMBLING WEB APPLICATION

A user-friendly platform that assists users in building custom PCs by selecting compatible hardware components. It ensures component compatibility—such as CPU socket type, power requirements, and motherboard support—through an automated validation system, making PC building easier and error-free.

### • JOB SEEKER WEB APPLICATION

A platform that connects job seekers with employers, simplifying the recruitment process. Users can create profiles, upload resumes, and search for jobs based on various criteria. Employers can post job openings, review applications, and filter candidates by qualifications and skills.

## SOFT SKILLS

- Good communication skills
- Team player
- Quick learner
- Problem-solving mindset

## INTERNSHIP

### Python Programming Intern

Extazee Software Solution, Trichy

Completed a 30-day internship on Python basics and OOP; built a mini calculator app and gained hands-on experience with core programming concepts using Python 3.10.
